

Product Safety Recall

MAP/Pro Gas Cylinders

Manufactured in the USA by Worthington Cylinders

Sold at plumbing and refrigeration merchants and other industrial outlets

Defect Complete shut-off of cylinder valve may be delayed for some minutes following removal of hand/brazing torch from the cylinder.

Hazard Defect will result in leakage of gas from cylinder creating a risk of fire or explosion

What to do Consumers should immediately stop using the cylinder. Any partially used cylinders should immediately be vented/purged outdoors in a well-ventilated remote area in accordance with standard industry safety procedures or burnt off using the torch in accordance with the its instructions. Key points are keep flame full to avoid over heating the tip and suggest you work in bursts of 5 minutes. Do not overheat the torch. With the torch (in good condition) attached, the cylinder will not leak.

Emptied and/or new **unused** cylinders should be returned to the place of purchase for replacement or refund when proof of purchase is established.
