

PATTON & ALFA LAVAL :: EXCLUSIVE DISTRIBUTION.

Patton Ltd is pleased to announce an exclusive distribution of air products for renowned manufacturer Alfa Laval in the New Zealand, Australia and South Pacific regions.

Established in 1883 Alfa Laval is a leading global provider of specialized products and engineered solutions and Patton is proud to be representing the following range of “air products”:

- **Air Cooled Condensers:**
 - Alfa Blue
 - Alfa Green
 - Alfa V
 - Alfa V Mono
- **Dry Coolers:**
 - Alfa Blue
 - Alfa Green
 - Alfa V
- **Unit Coolers:**
 - **Cubic Line:**
 - Slim
 - Compact
 - Alfa Cubic
 - Airmax
 - Airmax II.
 - **Ceiling / Dual Discharge:**
 - Top
 - BFG/B
 - TFG
 - Big Top
- **Blast Freezers:**
 - Alfa Blast

Application of the above equipment is predominantly Freon based in the commercial refrigeration sector however most can be applied to [CO2, Ammonia or Glycol](#). Additional to the above air products Patton is available to assist with other Alfa equipment; eg the Helpman range, FinCoil range and H.X product (BPHE, gasket H.X etc).

Alfa Laval are recognized throughout the refrigeration industry as representing quality and innovative products that provide proven solutions for many refrigeration and air conditioning applications. They have consistently emphasized and invested in product development engineering and are, like Patton, a leader in the introduction of new products for the ever changing demands of the refrigeration industry.

Just as with Patton's, Alfa Laval's philosophy is to provide equipment and systems dedicated to helping customers optimize the performance of their processes.

The distributorship will enable Patton's to pursue growth and take advantage of opportunities to expand into new market areas with proven product line offerings. "We are excited about the opportunity to acquire exclusive distributorship with a well known quality product, and the opportunity to see Patton enhance the Alfa Laval brand to a level of excellence focused on customer service and product support".
