

Patton Unit Coolers in Manila.

At a recent Manila technical seminar, in association with Tecumseh, PATTON LTD were invited to present their 60Hz Unit Cooler range to local refrigeration contractors MAGIC-AIRE.

The seminar resulted in the supply and subsequent installation of a matched Patton "B Series" low temp Unit Cooler with a Tecumseh condensing unit for a freezer storage room in the local LIANA'S supermarket.

MAGIC-AIRE's technicians were very happy with the units ease of installation and have been most impressed with its performance since commissioning. As a spin-off from the positive results their intention is to use this installation as a means to promote the Patton brand.

Patton product for the Manila market is manufactured from our Bangkok based plant in Thailand and Unit Coolers have been specifically engineered for the regional conditions.

Patton's ability to build "regional specific equipment" and provide short lead times, together with its strong engineering and sales team, ensures excellent customer support in today's competitive markets.

Patton equipment can be found in New Zealand, Australia, Pacific Islands, China, India, Middle East & Sth America.
