

## PattonPaks for “Mobile Cool Room” Refrigeration.

Patton in Rockhampton, Central Queensland - Australia, has recently been closely working with their customer “Rocky Refrigeration” to provide mobile cool room cooling solutions.

Using the newly released “PattonPak” boxed condensing units provides a compact solution and ensures all components are weather and vandal protected. The PattonPaks are then coupled to the efficient and reliable Patton “B Series” unit coolers to provide rapid pull-down for the on-site cooling.

Presently Rocky Refrigeration have two units successfully on the road, both units recently seen by 60,000+ visitors to the large Rockhampton week-long festival “BEEF 2009”, with a further ten rooms to be added to the fleet over the next twelve months.

To discuss mobile cool room equipment requirements please contact any one of our Patton outlets.
